

# *New Motels in Moab*

There are too many motels; they line the highway from the river clear through the town.

We don't need more motels. We need industry where men can get jobs that pay a decent wage. Pretty soon people won't be able to live here; like Aspen where the workers have to commute to work. Not good really.

While there is a need for more lodging, there is no need for it all to look the same and have no character.
